Local citizens striving for 9/11 Truth. Be a part of the Global Truth Movement!!

Examine the Evidence, End the Lie!

Watch the videos on our website and learn the Truth.

"No matter what you believe, it doesn't change the facts."

~ Al Kersha ~

False Flag Operations (governments attacking their own people to further agendas of war and rolling back civil liberties – ultimately “to control”) have historically been documented (for a closer look at False Flag Operations, do your own research into this topic). 9/11 was such an event and the evidence speaks volumes, as there was an overwhelming amount of video footage that aired that day via the mainstream media. Much of the revealing footage aired once and then never again... why? Consider this fact: Six (6) mega corporations control the world’s media and all are tied into the military industrial complex and/or oil. War is their business and so is the control of information. So is it unrealistic that the rich and powerful could create a propaganda machine that could keep the masses in the dark about numerous unknown facts surrounding 9/11? Read on, do your due diligence and help end the war on terror... the war on you!

How Strong is 9/11 Truth in Canada?

Virtually every major city in the USA and Europe have formed 9/11 Truth Movements.

World Trade Center 7, the 47 storey skyscraper which fell at 5:20pm was not hit by an airplane, yet fell with perfect symmetry into its own footprint. Small fires were reported in early afternoon and even though owner Larry Silverstein admitted in a PBS documentary that he gave the order to “pull it” (a demolition term), the official 9/11 Commission Report and a FEMA report fail to explain why it fell. WTC 7 housed the offices of the CIA, FBI and other federal branches. Incidentally, all records involving investigations of government and wallstreet fraud were destroyed. Ironically, new evidence has arisen where the BBC reports the collapse of WTC 7 almost 30 minutes before it collapsed (see below – google video BBC wtc7). And then there are the **Twin Towers**... Collapsed because of fire being the official story: Steel framed building don’t collapse due to fire. A recent example is the Madrid fire in which a steel framed building burned hot – **an inferno for many hours** – from top to bottom and the core columns did not collapse (see left).

110-Storey skyscrapers collapse at near free-fall speed; concrete walls and floors are pulverized into dust; multiple explosions are heard by eyewitnesses, a dark volcano of ash darkens the sky. Can exploding jet fuel and office furniture fires perform such a feat?
